Dr Ng Ka Wing Gary was unfortunately diagnosed with bone cancer on his 14th birthday and had to have his left leg amputated. Fortunately, with the care and support of his family and medical staff, the encouragement of teachers and classmates, and the sharing of other bone cancer patients, he managed to pick up courage to face the anti-cancer path. This experience made him realize that being able to take part in volunteer service is a blessing. It also inspired him to make determined effort to study medicine and to serve in the orthopaedic department where he had received treatment.

Everyone can choose the volunteer service that suits one's interests and talents. Having gone through what had happened, Dr Ng encouraged other patients to visit cancer children in hospitals. For purposes of promoting social inclusion, he accepted invitations from patients' self-help groups, secondary schools, and youth organizations to share own experience on self-reliance and facing the adversary.

In addition, Dr Ng actively worked for the benefit of the disadvantaged and the welfare sector. In order to bring their needs to the attention of society, he played the role of ambassador, director, consultant or secretary in many charitable organizations. Currently, he is the Chairman of the Hong Kong Federation of Handicapped Youth. He was dedicated to promote barrier-free community, the rights of the disabled and 'Sport for all' for the disabled, as well as fighting for equal participation and social integration between the able-bodied and the disabled. In 2018, he was appointed a member of the Social Welfare Advisory Committee, so that he could reflect the views of different sectors of the community and made suggestions on the social welfare policies.
